## CHIJ ST NICHOLAS GIRLS' SCHOOL (PRWARY)

## Paper 1

## Booklet A

## 21 August 2023

## 15 questions

20 marks

Total Time for Booklets A and B: 1 hour

## INSTRUCTIONS TO CANDIDATES

Do not turn over this page until you are told to do so.
Follow all instructions carefully.
Answer all questions.
Write your answers in this booklet.
The use of calculators is NOT allowed.
This booklet consists of 10 printed pages.

Questions 1 to 10 carry 1 mark each. Questions 11 to 15 carry 2 marks each. For each question, four options are given. One of them is the correct answer. Make your choice (1,2, 3 or 4). Shade the correct oval (1,2,3, or 4) on the Optical Answer Sheet.

1. Which one of the following is one million, three hundred thousand and seventy in figures?
(1) 1003070
(2) 1003700
(3) 1300070
(4) 1300700
2. Which one of the following when rounded to the nearest thousand is 60000 ?
(1) 59097
(2) 59483
(3) 60123
(4) 60599
3. Abraham invested $\$ 18000$ in an tnvestment fund. The bank paid $4 \%$ interest at the end of each year. How much interest did he earn at the end of 1 year?
(1) $\$ 18720$
(2) $\$ 17280$
(3) $\$ 7200$
(4) $\$ 720$
4. The table below shows the time taken by 4 swimmers in a competition. Who is the fastest swimmer?

| Swimmer | Balan | Carson | Darvesh | Ee Yong |
| :---: | :---: | :---: | :---: | :---: |
| Time taken (min) | 4.2 | 4.02 | 4.28 | 4.4 |

(1) Balan
(2) Carson
(3) Darvesh
(4) Ee Yong
5. Figera has wo $10 \nRightarrow$ coins, six $20 \not \&$ coins and three $50 \&$ coins. What is the least number of coins that she can use to make $\$ 2$ ?
(1) 6
(2) 5
(3) 3
(4) 4
6. Identical cubes were glued together to form the 4 solids, A, B, C and D.

Which 2 solids could be joined to form the solid below?

(1) A and B
(2) A and D
(3) B and C
(4) C and D
7. The figure below shows a cube.

Which one of the following faces, $P, Q, R$ or $S$ in the figure is nof part of the net of the cube?

(1) P
(2) $Q$
(3) $R$
(4) S
8. Gayatri is standing at point $Q$ facing the market. Which place will she be facing if she turns $225^{\circ}$ anti-clockwise?

(1) park
(2) library
(3) swimming pool
(4) community club
9. The sum of 6 numbers is 70 . The average of 4 of the numbers is 12 . What is the sum of the remaining numbers?
(1) 1.1
(2) 22
(3) 29
(4) 58
10. A group of workers was asked to vote for their favourite food, carrot cake, mee siam and nasi lemak. The pie chart shows the workers' choices. The workers' choices were also represented by 4 graphs. Which of the following graphs best represents the information in the pie chart?

(1)

(2)

(3)

(4)

11. The table below shows the number of families with different number of children in a block of flats. There are 300 children altogether.

| Number of <br> chlldren <br> per family | 0 | 1 | 2 | 3 | 4 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Number of <br> families | 15 | 23 | 51 | $?$ | 10 |

How many families are there with 3 children each?
(1) 40
(2) 45
(3) 120
(4) 135
12. One sandwich costs 5 times as much as one pie. Iker has just enough money to buy four such sandwiches and eight such pies. However, he only wants to buy ples, What is the greatest number of ples he can buy with $\frac{3}{5}$ of his money?
(1) 15
(2) 16
(3) 17
(4) 18

- 13. The figure below is formed by 3 big identical equilateral triangles and 3 small identical equilateral triangles. The length of GH is 54 cm . What is the permeter of the figure?

(1) 162 cm
(2) 324 cm
(3) 486 cm
(4) 972 cm

14. During an enrichment lesson, each pupil in a class was given either 2 or 3 dice. The ratio of the number of pupils to the number of dice given was $9: 23$. What fraction of the pupils were given 2 dice each?
(1) $\frac{4}{9}$
(2) $\frac{5}{9}$
(3) $\frac{5}{14}$
(4) $\frac{9}{14}$
15. Figure $X$ is a trapezium and Figure $Y$ is a parallelogram. Which pair of the following statements is true?
$s$

(1)

| Figure $X$ | Figure $Y$ |
| :---: | :---: |
| Opposite sides are parallel | Opposite sides are parallel <br> $L$ |
| Has one pair of <br> perpendicular lines | Does not have any pair of <br> perpendicular lines |
| $\angle c+\angle d=180^{\circ}$ | $\angle f+\angle h=180^{\circ}$ |
| $\angle a+\angle b=180^{\circ}$ |  |$\quad$| $\angle i+\angle h=180^{\circ} \cdots \cdots$ |
| :---: |

## CHI ST NICHOLAS GIRLS' SCHOOL (PRIRARY)

Paper 1

## Bookfet B

21 August 2023
15 questions $\ldots . . . . . . . .$. 25 marks

Total Time for Booklets A and B: 1 hour

## INSTRUCTIONS TO CANDIDATES

Do not turn over this page until you are told to do so.
Follow all instructions carefully.
Answer all questions.
Write your answers in this booklet.
The use of calculators is NOT allowed.

Questions 16 to 20 carry 1 mark each. Show your working clearty and write your answers in the spaces provided. For questions which require units, give your answers in the units stated.
16. The total height of a doll and a box is 1.09 m . The height of the box is more than 0.2 m but less than 0.9 m . It is a decimal with 2 decimal places. Write down a possible height of the doll.

Ans: $\qquad$ m
17. Find the value of $3-\frac{1}{8}$. Leave your answer as a mixed number in the simplest form.

Ans: $\qquad$
18. $60 \%$ of a number is 150 . What is the number?

Ans: $\qquad$
19. What is the length of the arrow?

cm

Ans: $\qquad$ cm
20. The table shows the number of Primary 6 pupils who had their weight measured Some information was smudged with Ink.

Do not write in this space

| Category | Number of: boys | $\begin{aligned} & \text { Number of } \\ & \text { girs } \end{aligned}$ | Number of Primary 6 pupis who had their weight measured |
| :---: | :---: | :---: | :---: |
| Underweight | 15 | 19 | 34 |
| Acceptable Weight | 118 | 97 |  |
| Overweight | 11 |  |  |
| Total number of Primary 6 Pupils |  |  | 276 |

What is the difference between the number of girs who are underweight and overweight?

Ans: $\qquad$
$\square$

Questions 21 to 30 carry 2 marks each. Show your working clearly and write your answers in the spaces provided. For questions which require units, give your answers in the units stated.
21. The pie chart represents the number of the difterent flavours of cakes in a bakery. What is the total number of blueberry cakes and mango cakes?

Ans: $\qquad$
22. A bowl cost $\$ r$ and a pot cost $\$ 14 r$. Jacie bought 7 such bowls and 1 pot.

She had $\$ 30$ left. How much money did she have at first? Leave your answer in terms of $r$.

Ans: \$ $\qquad$
23. In the figure, $P Q=P S$ and $Q R$ is a straight line Find $\angle R Q S$.

Ans: $\qquad$ -
24. Complete the figure below to form a symmetric figure. WX is the line of symmetry.

25. Nathim's present age is a factor of 72 . Two years ago, his age was a multiple of 4. Write down the possible present of ages Nathim.

Ans: $\qquad$
26. Ko Sheen took a tolal of 10 minutes to jog 5 rounds. Each round was 0.4 km . Find her average speed for the 5 rounds.
$\qquad$ $\mathrm{m} / \mathrm{min}$
27. Leroy was $\frac{1}{5}$ h late for a musical. He watched the musical for 1 h 38 min before it ended at 3.15 p.m.
(a) For how many minutes was Leroy late for the musical?

Ans: (a) $\qquad$ $\min$
(b) At what time did the musical start?

Ans: (b) $\qquad$ p.m.

On which day was the number of messages Marco received the closest to the average number of messages he received from Tuesday to Friday?

Ans: $\qquad$
29. In the moming. Uncle Nong had more toy cars than foy boats at his shop at first. In the afternoon, he sold $\frac{1}{2}$ of the number of toy cars and 6 toy boats. He did Do not not sell all the toy boats.

Each statement below is either true, false or not possible to tell from the information given. For each statement, put a tick $(v)$ in the correct column.

| Statement | True | FalseNot <br> possible <br> to tell |  |
| :--- | :--- | :--- | :--- |
| In the morning, Uncle Nong had a total of <br> 13 toy cars and toy boats at first. |  |  |  |
| In the afternoon, Uncle Nong had more <br> toy cars than toy boats left. |  |  |  |
| The least possible difference between <br> the number of toy cars and toy boats <br> Uncle Nong had left was 5. . . | $\ldots$. | $\ldots . . .$. | .. |

30. In the figure below, ACEG is a rectangle and ABJH is a square. The area of the shaded rectangle JDEF is $36 \mathrm{~cm}^{2}$ and the length of $H G$ is 9 cm . Find the length of AC .

Ans: $\qquad$ cm
$\qquad$

## INSTRUCTIONS TO CANDIDATES

Do not tum over this page until you are told to do so.
Follow all instructions carefully.
Answer all questions.
Write your answers in this booklet
The use of an approved calculator is expected, where appropriate.

Questions 1 to 5 carry 2 marks each. Show your working clearly and write your answers in the spaces provided. For questions which require units, give your answers in the units stated.

1. Adora had 45 magnets at first.She bought some more magnets. Then she shared what she had bought equally between herself and her cousin. In the end, Adora had 69 magnets. How many magnets did Adora buy?

Ans: $\qquad$
2. The figure shows 4 identical triangles inside a square. The perimeter of the square is 280 cm .

(a) What is the length of $y$ ?

Ans: (a) $\qquad$ cm
(b) The 4 triangles are then cut from the square. What is the area of the remaining figure?
$\qquad$ $\mathrm{cm}^{2}$
3. The figure below shows a parallelogram $A B C D$ drawn on a giid

By joining dots on the grid with straight lines,
(a) draw triangle FCE such that FCE is an acute-angled triangle.
$C E$ is shorter than $A B$ and $C E=E F$.
(b) draw shombus GHJK such that $F$ is the centre of GHJK.

Use a pencil to draw your diagrams and label them cleady.
4. In the figure, KN and JL are straight lines. LPK is an equilateral triangle and JK// ML. The sum of $\angle \mathrm{MJL}$ and $\angle \mathrm{LMJ}$ is $138^{\circ}$. Find $\angle \mathrm{QLP}$.

Ans: $\qquad$ 0
5. A tank was $\frac{1}{3}$ flled with water at 4 p.m. Waker flowed out of the tank from 4 p.m. to 9 p.m. The amount of water that flowed out of the tank is not shown on the scale.

(a) From $5 \mathrm{p} . \mathrm{m}$. to $9 \mathrm{p} . \mathrm{m} ., 125 \ell$ of water flowed out of the tank. What is the capacity of the tank?

Ans: (a) $\qquad$ $\mathrm{cm}^{3}$ [1]
(b) At what time was $100 \ell$ of water left in the tank?

Ans: $\{b\rangle$ $\qquad$ p.m. [1]

For questions 6 to 17, show your working clearly and write your answers in the spaces provided. The number of marks availabie is shown in the brackets ( ) at the end of each question or part-question.
6. The table shows the prices of 5 items.

| Mtem | Price (\$) |
| :---: | :---: |
| Cap | 4.00 |
| Towel | 0.90 |
| Haversack | 8.90 |
| Water bottle | 17.50 |
| Sleeping bag | 16.50 |

(a) Of the 5 items, Glynis bought 3 of them and Levivia bought the remaining items. The items each of them bought were different. Glynis spent $\$ 11$ more than Levivia. How much money did Glynis spend on the 3 items?
$\qquad$
(b) What was the cheapest item each of them bought?

Ans: (b) Glynis $\rightarrow$ $\qquad$

Levivia $\rightarrow$ $\qquad$ [2]
7. At frot, there were some children and 132 aduts at a party. $\frac{6}{11}$ of the aduts left the party. Then another 14 children joined in the party. In the end, the number of adults who remained at the party was the same as the number of children.
(a) How many adults remained at the party?

Ans: (a)
Do not [1]
(b) How many people were there at the party at first?

Ans: (b) [2]
8. A group of singers are arranged in 5 rows. There are 7 singers in the second row. Each row has $n$ more singers than the row in front of it.
(a) How many singers are there in the first row? Leave your answer in terms of $n$.
$\qquad$
(b) Given that there are 13 singers in the fourth row, find the value of $n$.

Ans: (b) $\qquad$ [1]
(c) How many singers are there altogether in the 5 rows?

Ans: (c) $\qquad$ [1]
9. Zhi Cong can type 90 words in every 2 minutes. He tends to type 9 words incorrectly every 10 minutes.
(a) At this rate, how many words can Zhi Cong type allogether in 2 hours?

Ans: (a) $\qquad$ [1]
(b) What is the total number of words he can type correctiy in 2 hours?

Ans: (b) $\qquad$ [2]
10. The figure is made up of a semicircle, a large circle and a small circle. $O$ is the centre of the semicircle and the large circle. $X$ is the centre of the small

Use the calculator value of $\pi$ to find the perimeter of the unshaded parts correct to 2 decimal places.
$\qquad$ [3]
14. $\bar{A} B C D$ is a rectangle. $A E$ and $D G$ are straight lines. $\angle A D F=\angle F D E$.

(a) Find $\angle F D E$.
(b) Find $\angle B G D$.

Ans: (b) $\qquad$ [1]
(c) Find $\angle \mathrm{FAG}$.

Ans: (c) $\qquad$ [1]
$\qquad$ ]
12. On Saturday, Mr Zusin sold five different types of items. He prepared 66 of each item at the start of Saturday. He sold every item at the same price. The bar graph shows the number of items sold on Saturday.

Do not write in this space

(a) Which item had the most number left unsold at the end of Saturday?

Ans: (a) $\qquad$
(b) On Saturday, Mr Zusin sold the pens at $\$ 1.95$ each. How much money did he collect?

Ans: (b) $\qquad$ [1]
(c) On Sunday, Mr Zusin continued to sell the remaining unsold items from Saturday at any 3 for $\$ 5$. He sold all the thems. How much money did he collect on Sunday?

Ans: (c) $\qquad$ [2]

13. The admission tickets for children to watch a magic show were fixed on all days of a week. On Thursday, there were 80 boys and 60 girls at the show. On Friday, the number of boys increased by $30 \%$ and the number of girts decreased by $15 \%$.

Do not wite in this space Altogether, $\$ 9440$ was collected from the sale of admission tickets over the two days.
(a) What was the price of each admission ticket?

Ans: (a)
(b) What was the percentage increase in the number of tickets sold from Thursday to Friday?

Ans: (b) $\qquad$ [2]
14. In 2020, the ratio of the number of men to the number of women in Happy Factory was 2:1. The ratio of the number of men to the number of women in Cheery Factory was 7: 13. The total number of people in Happy Factory was $90 \%$ of the total number of people in Cheery Factory.
(a) What was the ratio of the number of men in Happy Factory to the number of men in Cheery Factory in 2020?

> Ans: (a)
$\qquad$ [2]
(b) In 2021, 8 men left Happy Factory to join Cheery Factory. Then the ratio of the number of men to the number of women in Cheery Factory became $3: 5$. What was the total number of men and women in Cheery Factory in 2020 ?

Ans: (b) $\qquad$ [2]
15. Omar spent $\$ 162$ more than $\frac{1}{7}$ of his monthly salary on transpori. He spent $\$ 40$ less than $\frac{1}{6}$ of his remaining salary on groceries. He spent $\$ 968$ on groceries.

Do not write in this space He saved the rest of his salary.
(a) How much of his monthly salary did Omar save?

Ans: (a)
(b) What was Omar's monthly salary?

Ans: (b) $\qquad$ [2]
(c) Find Omar's total salary in $1 \frac{1}{4}$ years.

Ans: (c) $\qquad$ [1]
16. A rectangular piece of paper was folded at wo of its comers $F$ and $H$ as shown.

(a) Find $\angle \mathrm{HKJ}$.

## Ans: (a)

$\qquad$
(b) Find $\angle \mathrm{DLF}$.

Ans: (b) $\qquad$ [1]
(c) Find $\angle \mathrm{GFH}$.

Ans: (c) $\qquad$ [1]
(d) Cincle the words that describe DEFL correctly in the following statement:

DEFL ( is / is not ) a trapezlum because DL ( is / is not ) parallel to EF.
17. An empty rectangular tank whe a base area of $1250 \mathrm{~cm}^{2}$ was to be filled with water from 2 taps, $X$ and $Y$. Tap $X$ filled the tank with water at $2.7 \ell$ per minute whlle tap $Y$ filled thth water at $1.5 \ell$ per minute. Tap $Z$ drained water out of the bank at $1.8 \ell$ per minute.

(a) At 12.41 p.m. all 3 taps were turned on. How much water was there in the tank a\{ 12.47 p.m.? Leave your answer in $\ell$ and ml .

Ans: (a)
(b) At 12.47 p.m., only tap $X$ was turned off. At 12.55 p.m., $\frac{1}{3}$ of the tank was filled with water. What is the height of the tank?
(c) At 12.55 p.m., tap $Z$ was also turned off. After some time, tap $Y$ was turned off. $\frac{3}{4}$ of the tank was filled with water. At what time was tap $Y$ turned off? Leave your answer in the 24 -hour clock.

Ans: (c) [2]
