- (a) Henry enjoyed a total tax relief of \$15 000 and paid \$14 130 of income tax for the year of assessment 2022. Calculate his annual income in 2022.  
[ Annual income = Chargeable income + tax relief ]

Answer \$ ..... [2]

Henry recently got a pay rise and his income is now \$15 500 per month. He is keen to buy a private condominium which is priced at \$1 200 000. To afford this condominium, he needs to apply for a bank loan of \$800 000.

- (b) The maximum duration of a housing loan for private properties is up to 35 years or 65 years of age, whichever is lower.

Given that Henry is 45 years old, find the maximum number of years Henry can loan from the bank.

*Answer* ..... years [1]

- (c) Henry decides to apply for a loan for the maximum duration allowed for his age. The loan from the bank is subject to a simple interest of 3.5% per annum.

The government introduced the Total Debt Servicing Ratio (TDSR) to prevent individuals from over-borrowing.

Information about TDSR

- Total Debt Servicing Ratio =  $\frac{\text{Total monthly debt repayment}}{\text{Monthly income}}$
- Total monthly debt repayment includes repayments for car loans, personal loans, credit card expenditure, home loans and other loans.
- The maximum TDSR allowed is 55%.

His current monthly debt repayment is shown in the table below:

Type	Amount (\$)
Car loan	1000
Credit card Expenditure	1000
Personal loans	1000

By considering the TDSR ratio, will the bank approve his loan request? Justify your answer and show your calculations clearly.

$$\tan \angle APP' = \frac{8.3680}{3.7587} \quad \text{--- M1: appropriate use of trigo ratio to find the angle}$$

$$\angle APP' = 65.8^\circ \text{ (1 d.p.)} \quad \text{--- A1}$$

$$\sin 70^\circ = \frac{AC}{7} \quad (\angle ABC = 70^\circ)$$

$$AC = 6.57784 \text{ m}$$

$$PC = 4 + 2.39414 = 6.39414 \text{ m} \quad \text{--- M1: seen length of } PC$$

$$\tan \angle APC = \frac{AC}{PC} = \frac{6.57784}{6.39414}$$

$$\angle APC = \tan^{-1} \left( \frac{6.57784}{6.39414} \right) \quad \text{--- M1}$$

$$= 45.8113^\circ$$

$$\text{The required angle} = 45.8113^\circ + 20^\circ = 65.8^\circ \quad \text{--- A1}$$

- 24 (a)  $\xi = \{\text{integers } x : 1 \leq x \leq 12\}$   
 $P = \{\text{prime numbers}\}$   
 $Q = \{\text{multiples of } 3\}$

(i) Represent the above information on the Venn diagram shown in the answer space below.

Answer

B1: every 6 correct values  
 B2: correct representation

(ii) List the elements in  $(P' \cap Q') \cup (P \cap Q)$ .

$$(P' \cap Q') \cup (P \cap Q) = \{1, 3, 4, 8, 10\} \quad \text{--- B1}$$

(iii)  $R = \{x : x \text{ is a multiple of } 6\}$

Use set notation to describe the relationship between  $Q$  and  $R$ .

$$R \subset Q \quad \text{--- B1}$$

(b) On the Venn diagram, shade the region which represents the set  $A \cap B'$ .

B1: correct shading

- 25  $OWXY$  is a sector of a circle, centre  $O$ , of radius  $r$  cm and reflex angle  $240^\circ$ .

The sector  $OWXY$  has an area of  $150\pi$  cm<sup>2</sup>.

- (a) Express  $240^\circ$  in terms of  $\pi$  radians.

$$\begin{aligned} 240^\circ &= 240 \times \frac{\pi}{180} \text{ rad} \quad \text{--- M1} \\ &= \frac{4}{3}\pi \text{ rad} \quad \text{--- A1} \end{aligned}$$

- (b) Show that  $r = 15$ .

*Answer*

$$\begin{aligned} \frac{1}{2}(r)^2 \frac{4\pi}{3} &= 150\pi \quad \text{--- M1: applied formula} \\ r &= 15 \quad \text{--- AG1} \end{aligned}$$

- (c) The radii,  $OW$  and  $OY$ , are joined together to form a cone.

Find the base radius of the cone.

*Answer*

**Method 1:**

Arc length = Circumference of circular base

$$\begin{aligned} 15\left(\frac{4}{3}\pi\right) &= 2\pi x \quad \text{--- M1} \\ x &= 10 \quad \text{--- A1} \end{aligned}$$

**Method 2:**

$$\pi x l = 150\pi$$

$$\begin{aligned} x &= \frac{150\pi}{15\pi} \quad \text{--- M1} \\ &= 10 \quad \text{--- A1} \end{aligned}$$

In the diagram above,  $O$  is the centre of the circle, such that angle  $COA = 132^\circ$ .  
 $PC$  is a tangent to the circle at  $C$  and  $PBA$  is a straight line.

By giving a reason for each step of your working, find

(a)  $\angle CDA$ ,

$$\angle CDA = 132^\circ \div 2$$

$$= 66^\circ (\angle \text{ at the centre} = \text{twice } \angle \text{ at circumference}) \text{ --- B1 reason, B1 answer}$$

(b)  $\angle CBP$ .

$$\angle CBA = 180^\circ - 66^\circ$$

$$= 114^\circ (\angle \text{ s in opp. segment})$$

$$\angle CBP = 180^\circ - 114^\circ (\text{adj. } \angle \text{ s on a st. line})$$

$$= 66^\circ \text{ --- B1}$$

B1:  $\angle$  s in opp. segment

(c) If the radius of the circle is 3.55 cm, calculate the area of triangle  $AOC$ .

$$\text{Area of } \triangle AOC = \frac{1}{2} \times 3.55 \times 3.55 \times \sin 132^\circ \text{ --- M1: applied area of triangle formula}$$

$$= 4.68 \text{ cm}^2 \text{ (3s.f.) --- A1}$$

Henry recently got a pay rise and his income is now \$15 500 per month. He is keen to buy a private condominium which is priced at \$1 200 000. To afford this condominium, he needs to apply for a bank loan of \$800 000.

(b) The maximum duration of a housing loan for private properties is up to 35 years or 65 years of age, whichever is lower.  
 Given that Henry is 45 years old, find the maximum number of years Henry can loan from the bank.  
 Answer ..... years [1]

Maximum number is  $65 - 45 = 20$  years

B1

(c) Henry decides to apply for a loan for the maximum duration allowed for his age. The loan from the bank is subject to a simple interest of 3.5% per annum.  
 The government introduced the Total Debt Servicing Ratio (TDSR) to prevent individuals from over-borrowing.

Information about TDSR

- Total Debt Servicing Ratio =  $\frac{\text{Total monthly debt repayment}}{\text{Monthly income}}$
- Total monthly debt repayment includes repayments for car loans, personal loans, credit card expenditure, home loans and other loans.
- The maximum TDSR allowed is 55%.

His current monthly debt repayment is shown in the table below:

Type	Amount (\$)
Car loan	1000
Credit card Expenditure	1000
Personal loans	1000

By considering the TDSR ratio, will the bank approve his loan request? Justify your answer and show your calculations clearly.
